

Explolabs striving to go bigger

The newly built laboratory offers a quick and efficient means of off-loading and loading test equipment.

After a 7 ton transformer tank arrived at our doorstep, there was no wasting time. We opened our doors and welcomed the test piece with no hesitation. In the past, this task would have been daunting and cause for a lot of man power. With the right amount of enthusiasm and equipment, no challenge is too big or too small for the Explolabs (Pty) Ltd team.
